

CARE INSTRUCTIONS FOR TIMBER PRODUCTS

The wood is harvested from sustainable forests.

Just as every tree is different, every piece of wood is different from the next.

Color and finish variations, random markings and irregularities such as knots, pits and mineral deposits are to be expected. They are not defects and vary from piece to piece.

Wood naturally responds to changes in temperature and humidity. Dry air will take away its moisture, causing shrinkage & slight surface cracks, humid air will cause the cracks to close again.

The handle used is made of brass and coated with chrome plating. Acid may cause damage to the finish. Use cotton cloth for regular cleaning of Handle. It is strong enough for home usage. Harder pull or rough handling may cause it to break or bend.

Artisanal pride and old world craftsmanship add to the charm of this item. The hand-finishing method insures each item is unique. We hope you enjoy this item for many years to come.

None of these characteristics affects the durability or life span of the furniture.

CARE INSTRUCTIONS:

- Please be careful of your back while lifting furniture as furniture is made of dense wood and is heavy to lift.
- Please follow the assembly instructions while putting furniture parts together.
- Dust regularly using a cotton cloth.
- Wipe spills immediately so as not to cause lacquer to breakdown.
- Do not use cleaning products that contains silicon or concentrated chemicals.
- Please take care while placing hot utensils direct on the furniture. We recommend usage of placemats under hot utensils.
- Please avoid placing your furniture near fire places, in direct sunlight or under heating/cooling vents. This furniture is made for indoor OR UNDERCOVER AREA.

- Use a dehumidifier, or open bowl of water in the room to keep moisture in the air if the above is unavoidable.
